

# Interact with Clients

ICAS2009B

Ref No: DDICAS09A

## Elements of Competency

### Deliver support to clients

- Provide support for clients in a courteous and professional manner according to organisational policy, taking into consideration cultural differences
- Use active listening and questioning to establish and confirm nature of client concerns
- Maintain client contact and provide progress information until the problem is resolved

### Respond to client complaints

- Demonstrate a positive and helpful attitude to client when handling concern and use sensitivity and discretion when handling issues
- Escalate and refer client concern to support person if required, explaining the nature of issues involved
- Resolve client complain using recommendations from the support person
- Document and record client concerns and solutions in line with organisational guidelines

**Number of Pages** 58

**Audience** This manual is aimed at people who are studying the Certificate II in Information & Communications Technology ICA20105. It covers the elective unit of ICAS2009B Interact with Clients. This manual is a learning resource and is not an assessment tool.

**Prerequisites** Nil

**Course Length** In a training environment this manual is suitable for approximately 20 hours.

**Course Structure** This course contains instructor lead exercises as well as examples completed at the students' own pace.

# Operate a Personal Computer (Windows Vista)

ICAU1128B

**Ref No:** DDICAU287

**Elements of  
Competency**

**Start the Computer**

- Check *peripheral device* connections for correct position
- Switch on power at both the power point and *computer*

**Access basic system information**

- Insert user name and password as prompted and note access, privacy, security and related conditions of use displayed on introductory screens
- Navigate through the *operating system* to access *system information* to identify system configuration and application versions in operation
- Use *on-line help functions* as required

**Navigate and manipulate desktop environment**

- Create and customise desktop icons
- Select, open and close desktop icons to access *application programs*
- Manipulate application windows and return desktop to original condition

**Organise basic directory/folder structure and files**

- Create and name directories and subdirectories
- Identify *attributes* of directories
- Move subdirectories between directories
- Rename directories as required
- Access directories and subdirectories via different paths

**Organise files for user and/or organisation requirements**

- Use *system browser* to search drives for specific files
- Access the most commonly used types of files in the *directories*
- Select, open and rename groups of files as required
- Move files between directories
- Copy files to *disk*
- Restore deleted files as necessary
- Erase and format *disks* as necessary

**Print information**

- Add a printer if required and ensure correct *printer settings*
- Change the default printer if appropriate
- Print information from an installed printer
- View and delete progress of print jobs as required

**No of Pages** 152

**Audience** This manual is aimed at people who are studying the Certificate I in Information & Communications Technology ICA10105. It covers the core unit of ICAU1128B Operate a Personal Computer (Windows Vista). This material is not aimed at technical administrators of a network. This manual is a learning resource and is not an assessment tool.

**Pre-requisites** Basic keyboarding skills.

**Course Length** In a training environment this manual is suitable for approximately one day.

**Course Structure** The course contains instructor lead exercises as well as examples completed at the students' own pace.

# Access and Use the Internet

ICPMM263B

Ref No: DDICP63A

## Elements of Competency

### Identify and use local resources

- Installed Internet software applications and their purposes are identified
- Internet software applications are used online and offline
- Extracting (decompressing) software and virus scanners are used on downloaded files
- Identify Internet connection and protocols
- Applications and files are downloaded and installed correctly
- Potential security risks are identified and avoided

### Identify and use remote resources

- Websites are navigated to locate required information
- Files and documents are accessed using the Internet (world wide web) search engines
- The Internet is browsed to find related sites via links
- Files are retrieved from an FTP repository
- Emails are sent, downloaded, read, responded and saved to
- Files attached to incoming email are retrieved and attached files are sent
- Newsgroups relevant to the industry are accessed

Number of Pages

# Receive & Process Oral & Written Communication

ICAD2003B

Ref No: DDICD03B

## Elements of Competency

### Receive and process oral communication from clients

- Demonstrate the accommodation of cultural differences in communication
- Receive and clarify oral messages in a courteous manner
- Log a written message according to organisational guidelines
- Send the message to the required person using an appropriate method

### Receive and process written communication

- Receive and process written communication, from clients
- Demonstrate the use of equipment to manage messages

### Respond to incoming telephone calls

- Answer telephone calls promptly according to the organisational requirements
- Determine and confirm the callers' requests and next actions
- Record messages according to the organisational guidelines
- Maintain records of documentation and reports associated with incoming calls

### Make telephone calls

- Look up client details for the correct telephone number
- Call the client using the appropriate greeting
- Deliver the message to the client and finalise the telephone call appropriately

**Number of Pages** 40

**Audience** This manual is aimed at people who are studying the Certificate II in Information & Communications Technology ICA20105. It covers the elective unit of ICAD2003B Receive & process Oral & Written Communication.

**Prerequisites** It is assumed that participants using this manual have a basic knowledge of the use of a mouse and keyboard.

**Course Length** In a training environment this manual is suitable for approximately 4 hours.

**Course Structure** This course contains instructor lead exercises as well as examples completed at the students' own pace.

# Connect Hardware Peripherals

ICAS2014B

Ref No: DDICAS14A

## Elements of Competency

### Confirm requirements of client

- Identify client peripheral requirements and confirm in accordance with organisational standards
- Document client requirements and peripherals needed in line with organisational standards and report findings to the appropriate person
- Verify client requirements with appropriate person in line with organisational standards and reporting procedures
- Take action to ensure client support expectations are covered by vendor warranty and support services

### Obtain required peripherals

- Obtain peripherals under instruction from appropriate person
- Enter peripherals into equipment inventory according to organisational standards
- Validate that contents of delivered components and physical contents match the packing list and resolve discrepancies if necessary
- Store peripherals according to vendor/manual guidelines

### Connect hardware peripherals

- Verify the timeframe for installation schedule with the client
- Remove old peripherals if they are being replaced with minimal disruption to clients, taking into account environmental considerations and OH&S standards
- Connect new peripherals with minimum disruption to clients, taking into account operating system procedures
- Configure the computer to accept the new peripherals
- Test hardware peripherals and confirm client satisfaction, pay particular attention to possible impact on other systems and make adjustments as required

**Number of Pages** 34

**Audience** This manual is aimed at people who are studying the Certificate II in Information & Communications Technology ICA20105. It covers the elective unit of ICAS2014B Connect Hardware Peripherals.

**Prerequisites** It is assumed that participants using this manual have a basic knowledge of the use of a mouse and keyboard.

**Course Length** In a training environment this manual is suitable for approximately 4 hours.

**Course Structure** This course contains instructor lead exercises as well as examples completed at the students' own pace.

# Capture a Digital Image

ICPMM321B

Ref No: DDICP21A

## Elements of Competency

### Assess digital camera qualities

- Camera software compatibility with hardware system is assessed and the appropriate software is selected for the job
- Pixel resolution of the camera is matched to the required quality and resolution of outcome
- The RAM capacity of the camera is checked to be appropriate to the number of images required to be captured
- Shutter speed, focal lengths and camera feature modes (eg flash, scrollage, icon menu, close-up, wide angle and telephoto capacity) are assessed suitable for the quality and use of photographic images required
- Lithium batteries are handled and stored according to OHS requirements

### Set up for image capture

- Camera is set up for image composition according to job specifications
- Lighting is arranged according to job specifications
- Light intensity is set for the correct exposure

### Preview image

- Tone curves are adjusted according to job specifications
- The neutral balance of the image is arranged and adjusted
- Adjustments to image composition and exposure are made
- 

### Photograph and upload a digital image

- The digital camera is loaded and operated according to manufacturer's specifications appropriate to the quality of image to be photographed
- The computer card interface/disk is uploaded onto the relevant computer and the image saved on hard disk
- Photographic image files are created and stored on the computer according to software procedures
- Photographic images are enhanced, cropped and altered electronically to deliver the required image
- Photographic images are checked for fitness of purpose and conformance to the job brief
- Photographic images are assessed fit for the relevant delivery mode (eg print, CD-ROM) and delivered appropriately
